## PROJECTS

### InnerPattern / Oct 2022 / [Deployed Site](#) / [Github](#) (team)

- MERN stack single-page application utilizing apollo and graphql for specific database queries, JWT for authentication, and bcrypt to provide security via password hashing.
- Facilitated team organization and goal setting during development.
- Responsible for wireframing, style, frontend and backend logic.
- Users are able to log in and create, read, update, and delete journal entries which are tied to their account.

### Tech Bits / July 2022 / [Deployed Site](#) / [Github](#)

- A CMS-style blog site utilizing MySQL and sequelize for the backend, express-session for authentication, and handlebars for rendering.
- Users are able to create an account, providing them with full CRUD functionality in regards to their posts.

### Weather Dashboard / June 2022 / [Deployed Site](#) / [Github](#)

- Weather forecast search-engine developed using jQuery, and integrated with an existing weather API.
- Users are able to search for any city around the world and view it's current weather, including a 5 day forecast projection.
